

K8's

kya pod k ander multiple same ports ho skte hai?

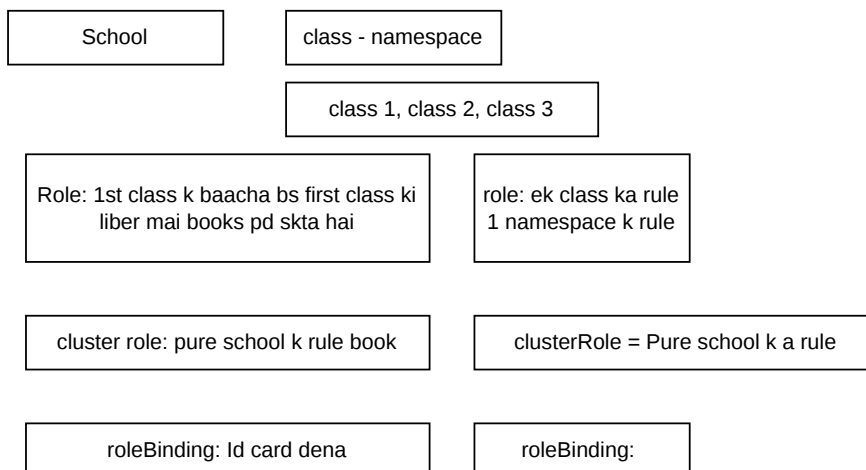

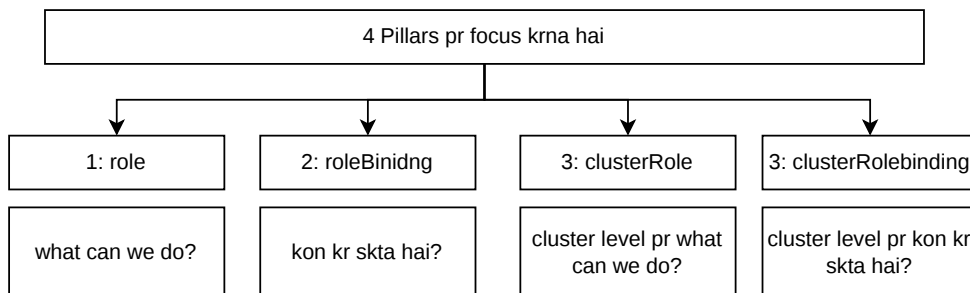

```
PS E:\Dev\Devops\Kubernetes\k8s-25-09-2026-rev>
PS E:\Dev\Devops\Kubernetes\k8s-25-09-2026-rev> kubectl.exe apply -f .\pod.yaml
Warning: spec.containers[1].ports[0]: duplicate port definition with spec.containers[0].ports[0]
pod/my-pod created
PS E:\Dev\Devops\Kubernetes\k8s-25-09-2026-rev>
```

```
kubectl.exe exec -it my-pod -c dev-container -- bash
```

Best Practice

1 POD == 1 Container

K8s Role Based Access Control

ClusterRoleBinding: super id card -
principle ko milega

IT manager

user: mukesh, over bhai, etc.

serviceaccount

Setup:

Step1: kubectl create namespace dev

Step2: kubectl create serviceaccount ovesbhai -n dev

Step1: kubectl create namespace dev

Step2: kubectl create serviceaccount ovesbhai -n dev
