

Azure Monitoring

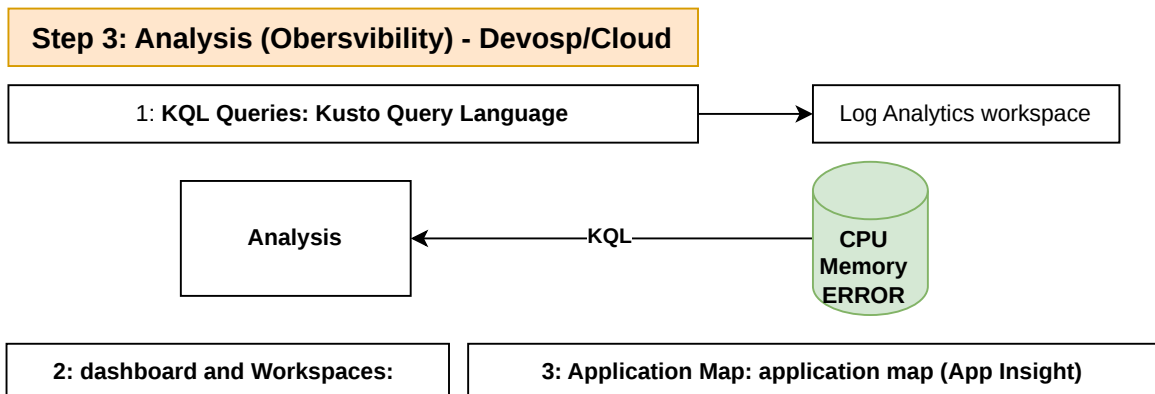

Step1: Data Collection:

Step2: Data Store

Step 3: Analysis (Obersvibility) - Devosp/Cloud

Step 4: Action/Alerts

1: Alert Rule: Trigger- ye aapke kql query k result wo dkehte rhta hai and hmne rule bnaya hai ki jesa hi CPU % 85% se upper y touch krt ahia toh alery fire kr do

2: Action Group: Response: Alert filer krne k baad krna kya hai:

1: Basic: Admin ko email kr diya hai (relevent team)

2: Advance: Service now or tcikting tool hoga wha pr ticket raise ho jaye automatically

3: zero touch (Auto Healing): Auto Scale up -> Auto Remediation

AMA kaise Install Krenege?
