

DEVSECOPS

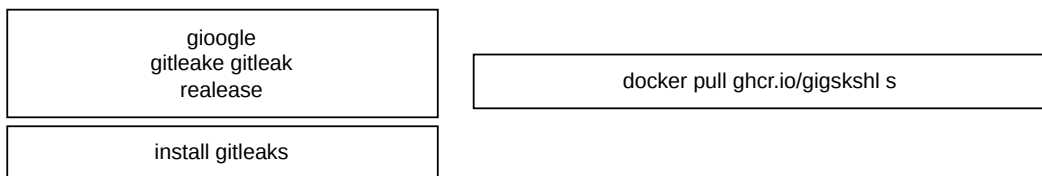

gitleake - The Secret Detective

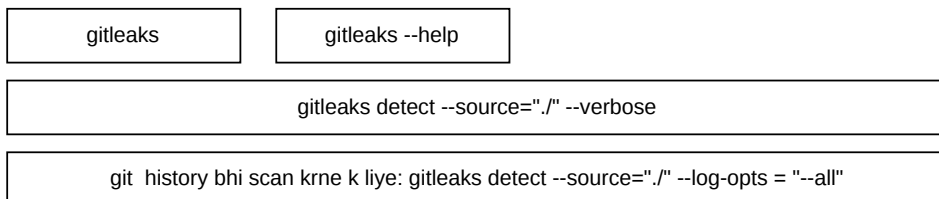

Maan lo aapke developer n client secrete daal diye code

step 1:

step 2: terraform repository wha pr scan clayenge

Trivy: The Vulnerability Scanner

isme 3 cheeje scan kr leta hai

1: Docker Images: kya aapke image mai koi purana pacakage, vulnerable packes hai?

2: terraform / IAC Files: koi security misconfiguration ho?

3: filesystem: koi vulnerable library ya dependencies

step 1:

gioogle
trivy
realease

docker pull trivy_image

install trivy

step 2: terraform repository wha pr scan
clayenge

step 2: docker image scan

trivy config <folder_path>

trivy image

Checkov (terraform policy policy): IAC (terraform/biceps/ARM)

Specicifclly IAC bna hai

pre build security rules hai

you can add any custom rules as well

EX: Storage account bnaya aapne usme encription on nhi kiya toh ye aapko error dega

step 1:

gioogle
checkov
realease

docker pull checkov

install checkov

step 2: terraform repository wha pr scan
clayenge

step 2: docker image scan

checkov

trivy image

checkov -d "folder_path"

checkov -f main.tf

Terratest (The Real Tester) - go language mai likha gya hai

terratest acutal mai aapke code ko execute krta hai and azure pr reosource vi bn jata hai and last mai destroy bhi kr deta hai

Interview Questions:

docker images run hoti hai wo layer by layer ku hoti hai?
